PROFILE

My goal is to gain experience in technical skills and industry processes. I have a new found passion for Web/Software Development and I'm very excited to see where it takes me. I'm confident my previous work as a Site Supervisor has provided me with similar core concepts that I can use when working as a Developer and to progress naturally as I develop more technical skills. Although I'm fairly new to the industry, I am experienced in managing large groups of people on projects start to finish while keeping everyone on time, on budget, safe, following quality expectations and following Australian Regulations all while constantly solving problems and managing delays and defects.

When I'm not coding my hobbies include exercising with my dog, gaming, AFL, socialising, renovating and always working towards something new and challenging.

Projects

Scrunch - Internship - Flutter, Firebase

Interning as a software Engineer, working on a mobile app that aims to improve personal well being through and AI companion that motivates the user.

Roles: Passwordless Login, Testing, Landing Page flow, In code documentation, ...still in progress

Coder Academy - MERN Stack - FreeSpace

A free tier webpage for artist to host their portfolios on
<https://github.com/lukelovekin/FreeSpace-CA-MERN-Project>
<https://free-space.gq/>
<https://free-space-api.herokuapp.com/>
